Association of Facilities Engineering (AFE)

Topic: Legionnaires Disease – A look back at 2015 and where we are headed in 2016. The past year gave us the best direction in helping to control Legionnaire's Disease (LD). From ASHRAE 188-2015, to NYS DOH directive for hospitals and then the NYS DOH regulation for cooling towers we have taken giant steps in joining the World Health Organization in preventing and controlling this problem. **Important!** - All cooling towers must have and implement a maintenance plan developed in accordance with ANSI/ASHRAE 188-2015 by March 1 2016. We will present a simple outline for such a plan. As a result of the changes that have taken place in New York State the United States Environmental Protection Agency is beginning to outline regulations for the future.
